

Sullair Optimalair™

Air Inlet Filtration

*High quality, cost effective
filtration that outperforms the
competition*

Key Benefits

- Longer fluid life
- Longer component life
- Reduced energy consumption

The Sullair Optimalair™ Advantage

Protect Your Investment

The air inlet filter is the most important filter in your compressor. You have only one chance to stop contaminants from going into your machine. By stopping it at the inlet filter, you extend the life of:

- ¥ Fluid filter
- ¥ Fluid
- ¥ Separator
- ¥ Air end

Particulate contamination is the #1 enemy of air compressors...a surefire way to destroy your investment. It will reduce the life of the air end, the separator and the fluid, and will increase horsepower leading to increased energy consumption. Only the best will do! Optimalair[®] with Nanofiber Technology! Only from Sullair.

Surface Loading Technology

In addition to the cellulose media substrate, there is an extremely fine layer of fibers, only 0.2 to 0.3 microns in

diameter, to capture contaminants less than 1 micron in size. Rapid accumulation of particles on the filter surface builds a thin, permeable dust-stopping layer. This ensures the highest filtration efficiency by eliminating premature filter plugging. As a result, the Sullair Optimalair[®] has very low pressure drop.

Air Audits

Sullair air audits review your entire compressed air system to identify ways to maximize efficiency; reduce waste; and reduce utility, maintenance, and equipment costs. And, Sullair is the only compressor manufacturer to offer three levels of air system audits that address the Department of Energy's standard levels—walk-through, assessment, and audit.

Customer Care by Sullair

Our Customer Care program gives you a complete package of all the system maintenance resources you need, and our training programs teach you how to properly operate, maintain, and service Sullair equipment. Our global customer support network gives you high-speed access to genuine Sullair service parts and responsive, knowledgeable service.

AirTility™

Sullair's AirTility™ is the industry's most comprehensive air outsourcing solution. Think of AirTility™ for your compressed air system just as you think of the electrical and water systems at your facility — as a utility. AirTility™ is for those who want a reliable, safe compressed air system with no capital expenditures and no maintenance worries.

System Monitoring

Sullair's eConnect™ remotely monitors and diagnoses the health of your compressed air equipment. Using only a computer and a web browser, the status of your entire system can be viewed from anywhere in the world. System monitoring also helps in preventive maintenance and trend analysis.

Core Products

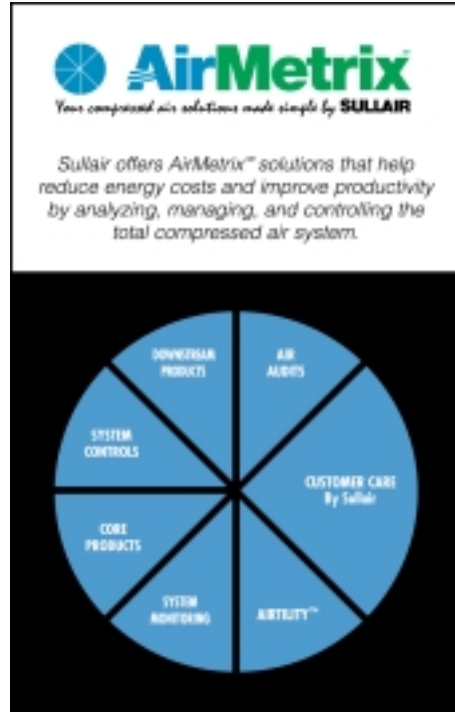

No one gives you more ways to efficiently produce clean air power than Sullair. Compressors are the heart of our business, and our reputation for reliability is reflected in our entire industrial compressor range, from 5 to 600 hp. Sullair also offers a wide range of dryers and filters for contaminant removal, as well as a range of rotary screw vacuum systems.

System Controls

Compressed air system controls match compressed air supply with system demand, and let you take a total systems approach to the most efficient production, distribution, and use of compressed air. Proper control is essential to efficient system operation and high performance.

Downstream Products

Sullair—and our distributor partners—are complete systems solutions providers for the demand side of your compressed air system. From the filter, regulator, and lubricator to the piping system and storage tanks, we provide a complete range of equipment and expertise to help keep your system at peak productivity.
